Project Name:	District Technology Renovations
Issue Date:	February 16, 2022

PROJECT QUESTIONS AND ANSWERS

*This document provides answers to questions asked by bidders who have reviewed the **Technology Request for Bid** for the above referenced project.*

Q1: Is Crestron the only option for a control system/multimedia processor? Or can we present something comparable to this system?

A: Base bids should include Crestron equipment as specified. Alternative equipment may be proposed as a voluntary alternate for Owner consideration.

Q2: South Campus Learning Commons: On the drawing for this space, it shows an ‘AV Switcher’ but no description in the specs. Do you have a specification for this item?

A: The “AV Switcher” represents the Crestron NVX device matrix along with the Crestron CP4 control system. The drawing is a logical representation of the major pieces of the system only.

Q3: When integrating the Owner supplied STROBE units with the AV integrator providing the network cabling run from the room to the network closet as well as the termination and installation of the Strobe... Will the owner be providing the network Patch cabling from the punch down in the closet to a specified port on the owner’s switch?

A: Patch cables in the data closet shall be provided by Owner. All other necessary patch cables are to be provided by Contractor as specified.

Q4: There are multiple mentions of Crestron NVX equipment and 4K 60 4:4:4 capable connections yet this equipment is not shown on the supplied drawing set. Also, the related display devices (projectors) are not 4K capable. Please clarify this.

A: See Q2. Owner and Designer are aware that the projectors are not 4k capable.
