A.I. IN THE CLASSROOM

Leverage artificial intelligence to improve teacher workflows and elevate student learning.

THIS COURSE WILL HELP TEACHERS:

- Improve lesson planning, grading and reporting.

- Deliver more effective and engaging lessons.

- Craft dynamic and intuitive personalized learning experiences for students.

- Devote more time to student interaction and individual support.

IN-PERSON

Join us in Grand Rapids, MI
Or bring us to your school

ONLINE

6 hours of active learning in our online course

cbdconsulting.com/a-i-classroom
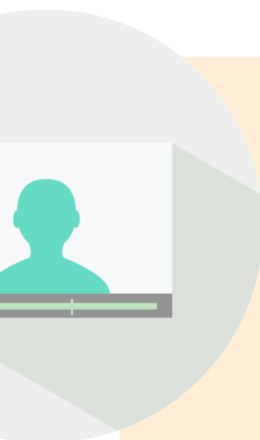

YOU WILL EXPERIENCE...

IN-PERSON

Active and collaborative learning with other educators on topics like:

- AI tools for teachers to increase productivity and efficiency in lesson planning, grading, and more
- AI tools for students to develop personalized, dynamic learning experiences
- AI ethical use and school policy considerations for safe and sound practice

All while be treated like the professional you are! Materials, meals, and other amenities are included.

ONLINE

Explore the same compelling topics as our in-person session through dynamic and active digital learning:

- Focused, polished video lessons on key topics and strategies
- Additional multi-modal content resources like visuals, organizers, infographics, and texts
- Sustained active thinking through regular reflection challenges and exploration materials
- Unlimited access for anytime learning and as-needed resources
